# WHISK INDUSTRIAL

## Hand Cleansers FOR THOSE EXTRA DIRTY HANDS!

### SKIN PREPARATION FOR BETTER HEALTH

**Cleaning your hands with a Professional Industrial Hand Cleanser, the right cleanser for the right job**

Not every cleanser works in every environment. The key to a better skin and hand health is using the proper Skin Cleanser for the environment. WhiskPower is five separate products all designed with different cleaning agents to target different industrial contaminants.

Dermis infection and damage is hazardous to long term health. We often neglect cuts and scrapes. Reviewing the image at left, the blood vessels are very close to the top of the skin. Working with contaminants daily allows the opportunity for contaminants to enter the blood stream through cracked cuticles, cuts and scrapes. Any access through the skin allows the opportunity for infection and access for contaminant poisoning.

#### Pre-Shift Preparation

##### Product 510 (Water Resistant) Product 525 (Solvent Resistant)

Prior to your shift use one of the featured products to prepare your skin to prevent industrial soils and contaminants from collecting in your pores of your skin, making skin cleansing easier.

#### Cleansing

##### Use WhiskPower Products

Cleanse your hands regularly throughout the day, keeping soils and contaminants out of your pores, cuts and scrapes. Each WhiskPower product has been created to cleanse and cut through various types of soils and contaminants.

#### Vital Replenish

##### Use WhiskGuard 550

Designed to use often and daily to help prevent damage to your cuticles and skin. WhiskGuard helps to prevent cracked cuticles, rough and dehydrated skin. Moisturized skin is easier to wash soils and contaminants freely from the skin. Dry skin allows contaminants to collect and adhere to the dermis.

# Whisk Products for Industry

## WhiskPower®

WhiskPower® soaps are designed to remove even the most stubborn dirt and grease from the hands. Various grits help loosen grit and grime from the skin.

## HandCleaner

Whisk Hand Cleaners loosen and dissolve tenacious soils. Formulated with only the safest additives available to remove oil, grease, paints, glue, sealants, tar, asphalt, and other tacky materials. Product easily flows into cracks and under fingernails to loosen dirt.

## WhiskGuard®

Many jobs require that a worker's hands come in frequent contact with a variety of chemicals, some harmful or irritating to the skin. For those with exposure to these environments, Whisk offers the following products to protect and restore the skin to its original condition.

## WhiskCare®

WhiskCare® soaps are designed to help eliminate commonly encountered germs from the hands. Each soap has been formulated to kill the bacteria found in various environments, while still cleansing the hands.

## WhiskIts®

Pre-soaked towels for removing tough soils quickly and conveniently. They are packaged in a canister that allows removal of one towel at a time. The lid automatically snaps shut after a towel is removed, keeping the remainder fresh, moist and ready for the next use.

## WhiskLotion®

Biodegradable lotion soaps leave the skin clean and fresh with a pleasant fragrance. They contain emollients that replace natural oils to condition the skin.
